

## Text Intensity

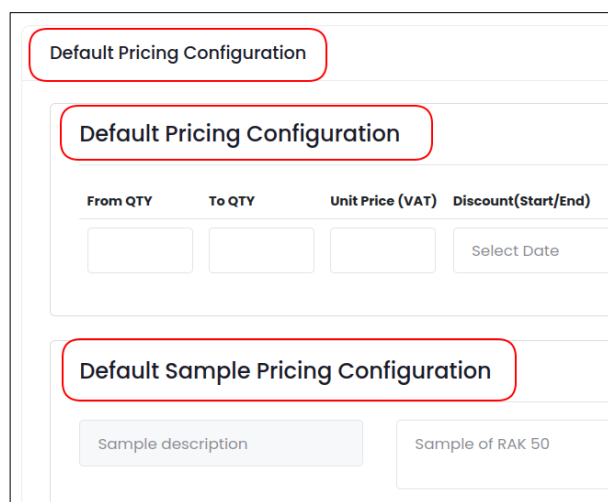

Inputs text must be darker than placeholder text.

A product form with various input fields. The 'Product Name' field contains 'RAK Ceramic GS-50' and is circled in red. The 'Tags' field contains 'ceramics' and 'tiles', with a placeholder 'Type and hit enter to add a tag' circled in red. The 'Short Description' field contains 'RAK Ceramics' and has a 'Remaining characters: 512' indicator. Other fields include 'Brand' (RAK Ceramics), 'Unit of Sale' (Pc), 'Country of origin' (United Arab Emirates), and 'Manufacturer' (RAK Ceramics). A 'Show Stock Quantity' toggle is at the bottom right.

## Headers Font Sizes

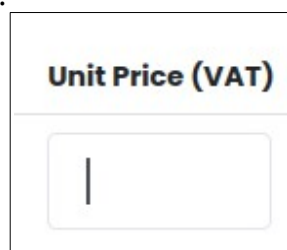

The font size of a sub-header should be smaller than the font size of a section header. If reducing the size will make it too small, then the font size of sections headers can be increased a bit.

A pricing configuration form. The 'Default Pricing Configuration' section has a header circled in red. Below it is a table with columns 'From QTY', 'To QTY', 'Unit Price (VAT)', and 'Discount(Start/End)'. The 'Default Sample Pricing Configuration' section also has a header circled in red. Below it are two input fields: 'Sample description' and 'Sample of RAK 50'.

## VAT Exclusive

All prices fields shall be VAT Exclusive.

A form field for 'Unit Price (VAT)' with a vertical cursor inside the input box.

# Percentage Adornment

The input field shall have a percentage adornment (%) at the end, so the user would know that he doesn't have to type it.

Discount  
Percentage

# Scroll After Popup

The system automatically scrolls up after closing a popup. This should not happen.

Default Sample Price

You don't have any warehouse supported by our shippers

OK

# Package Weight

“Package Weight” not “Weight Package”

d Par

Weight Package

# Temperature

The labels of these fields should explain to the user that the inputs are related to temperature.

Unit	Min	Max
Celsius		

# Shipper Field

Should be a drop-down.

Shipping Configuration

From QTY	To QTY	Shipper	Est. Del.
		vendor MawadOi	

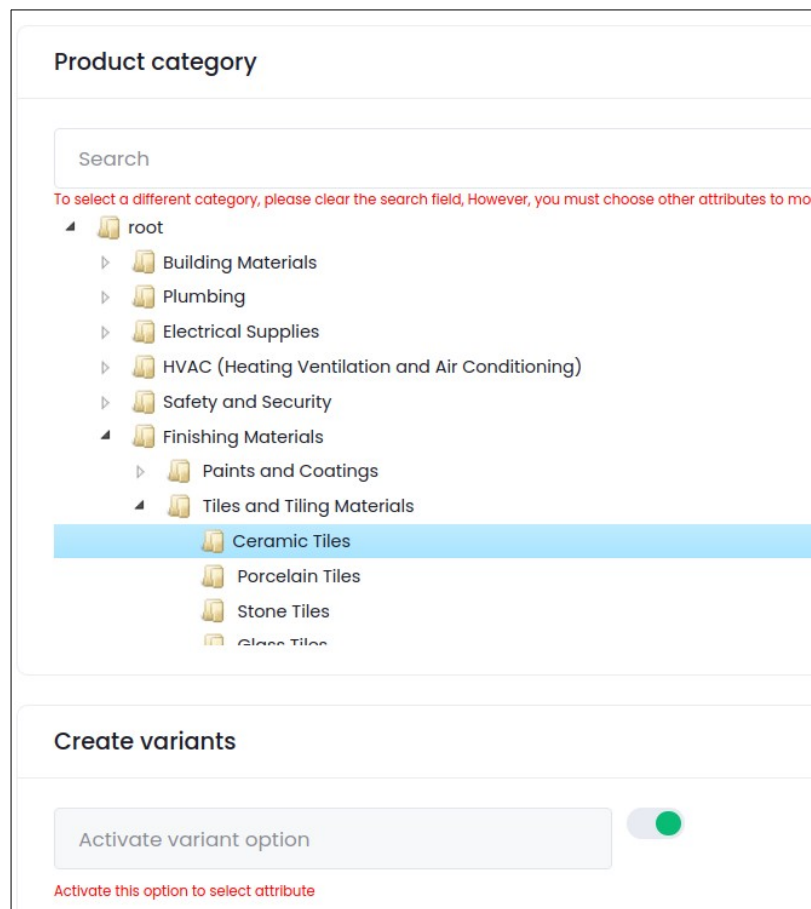

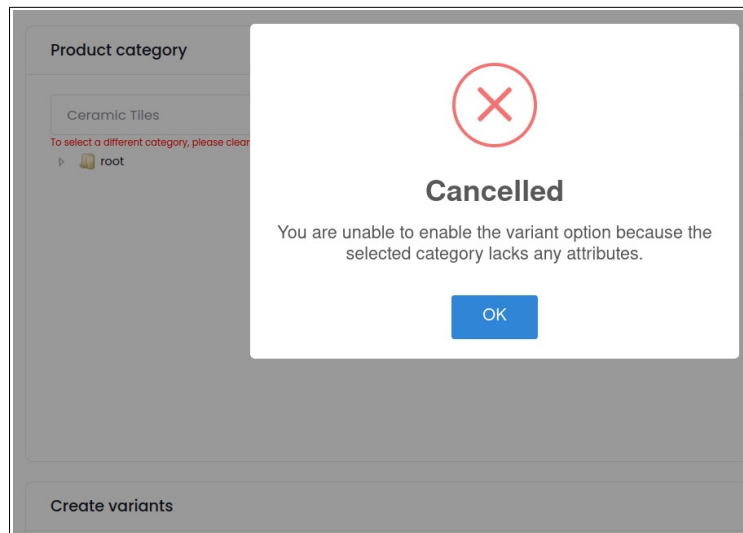

# Category Expansion

When editing a saved product, the chosen category of the product should be expanded.

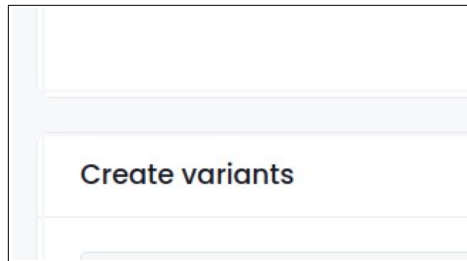

## Enabling Variants

The “Ceramic Tiles” category has no attributes, therefore the user cannot enable variants. However, if the user re-select the same category, the variants option becomes automatically enabled.

## Page Background

Change the page's background color to #F7F8FA (RGB = (247, 248, 250)),

## Variant Photos

The user cannot see the variant photos that he added.

### Variant informations 2

Variant SKU	
Variant Photos	Choose files

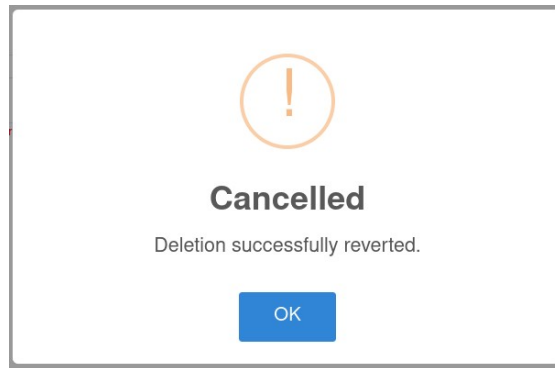

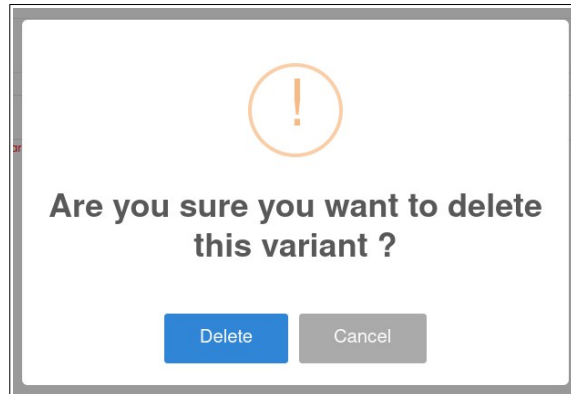

## Variant Sample

When switching the “Sample Available” off, the sample pricing and shipping should be set off automatically.

Sample Available?	<input type="checkbox"/>
Use default sample pricing configuration	<input checked="" type="checkbox"/>
Use default sample Shipping	<input checked="" type="checkbox"/>

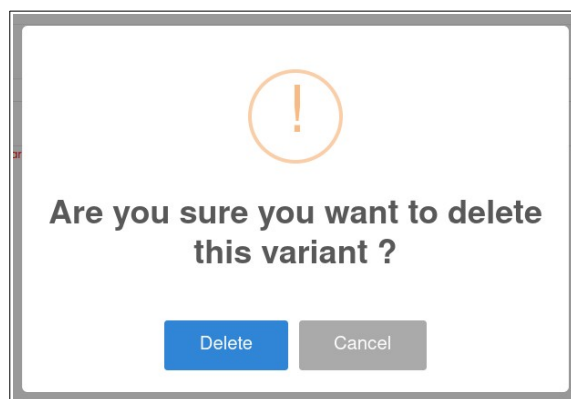

## Variant Deletion – Cancel Button

The second popup is not required when choosing the “Cancel” button.

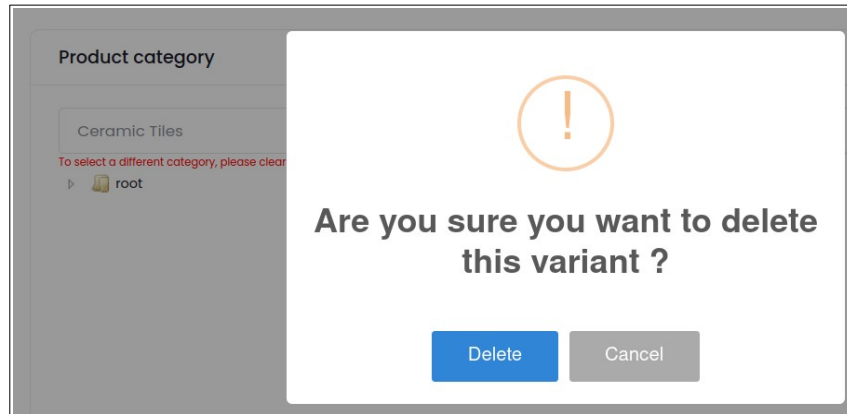

## Variant Deletion – Delete Button

The “Delete” button does not remove the variant. The system must remove the variant from the interface.

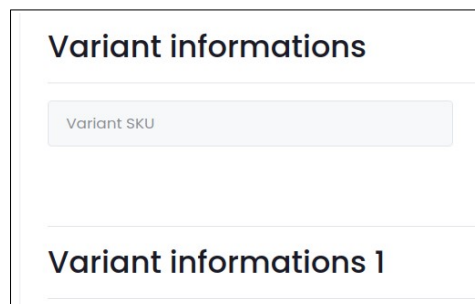

## Popup Page Scrolling

The page scrolls up before showing a popup. This should not happen. For example, when a user presses the cross button (x) of a variant block, the following popup appears on top of the Product Category block.

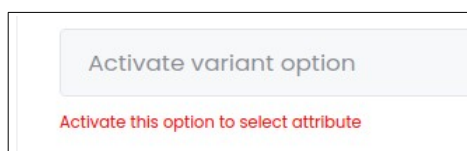

## Variant Information Header

Change “informations” to “Information”. Remove the (s) and make the (I) capitalized.

## ‘Create Variant’ Red Remark

Remove this red remark. Red remarks shall be used for errors or things that require high attention.

## ‘Third-Party Shipping’ Red Remark

The red remark shall be a directive text on top of 3<sup>rd</sup> party shipping fields (length, width, height, ..., etc.), not a hint under a label. Additionally, it shall be in black color with the following text: “Fill all required fields to confirm delivery by 3<sup>rd</sup>-party shippers”.

The screenshot shows a form titled "Mawadonline 3rd party configuration". At the top, there is a toggle switch and a text input field with the placeholder "Do you want to activate MawadOnline 3rd Par". Below this, a red remark is displayed: "Fill all required fields for shippers to confirm delivery ability.". The form contains five input fields labeled "Length (Cm)", "Width (Cm)", "Height (Cm)", "Weight Package", and "Weight". The "Weight" field has a unit selector dropdown currently showing "Kilo".

## Third Party Shipping Activate Label

Change “Do you want to activate MawadOnline...” to “Activate MawadOnline 3<sup>rd</sup> Party Shipping”. Make sure that all the text is visible on the label, so that the user can understand what is required.

This screenshot is identical to the previous one, but the text in the toggle switch area has been updated to "Do you want to activate MawadOnline 3rd Party Shipping". The red remark and the input fields remain the same.

## Headers Capitalization

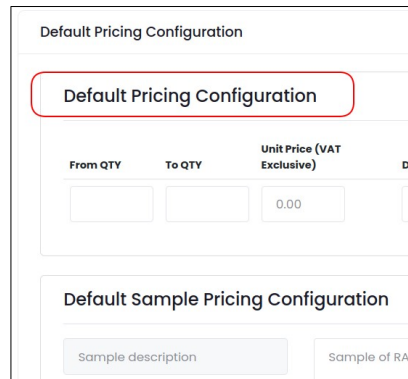

For all headers, capitalize the first character of each word. For example “MawadOnline 3<sup>rd</sup> Party Configuration”

This screenshot is identical to the previous ones, but the header text "Mawadonline 3rd party configuration" has been capitalized to "MawadOnline 3rd Party Configuration". The toggle switch text and the red remark remain unchanged.

## Product Pricing Header

The sub-header “Default Pricing Configuration” must be “Default Product Pricing Configuration”.

The screenshot shows a form titled "Default Pricing Configuration". Inside the form, there is a sub-header "Default Pricing Configuration" which is highlighted with a red rounded rectangle. Below this, there is a table with four columns: "From QTY", "To QTY", "Unit Price (VAT Exclusive)", and "Discount". The "Unit Price" column contains the value "0.00". Below the table, there is another section titled "Default Sample Pricing Configuration" which contains two input fields: "Sample description" and "Sample of RAH".

## Product Update Popup

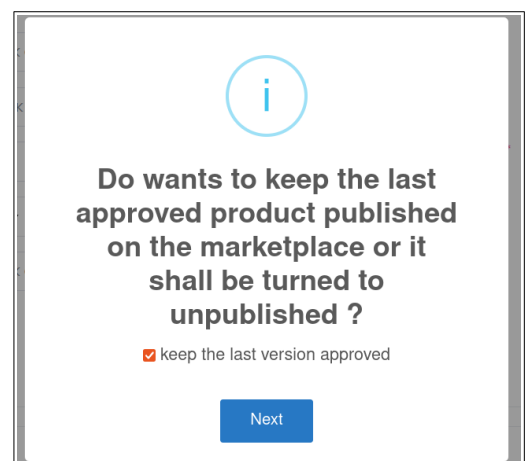

This popup needs to be modified:

- A title must be set, such as “Product Update”.
- The text must be of average font-size, not big font.
- The text must be changed to:

“As this product update requires approval, you can keep the last approved product published in the marketplace until the update is approved. If you unpublish the last approved product, then you have to publish the updated product after approval, manually.

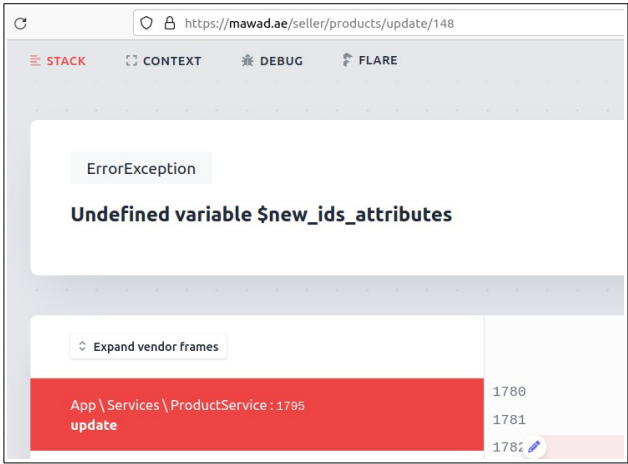

Do you want to keep the last approved product published?”

- Remove the checkbox.
- Replace the “Next” button with three buttons:
  - “Yes” and “No” buttons on the right.
  - “Cancel Update” button on the left.

The screenshot shows a popup window with a light blue background and a grey border. At the top center, there is a blue circular icon with a white lowercase 'i'. Below the icon, the text reads: "Do wants to keep the last approved product published on the marketplace or it shall be turned to unpublished ?". Below this text, there is a checkbox with a red checkmark and the text "keep the last version approved". At the bottom center, there is a blue button with the text "Next".

# Product Update Exception

# Sample Shipping Configuration

This block should be for Default Sample Pricing. It should not contain Default Sample Shipping. Default Sample Shipping should come after the Default Product Shipping. Additionally, the 3<sup>rd</sup> Party Shipping Fields are also required for the sample according to the requirements document.

## Saving the Product

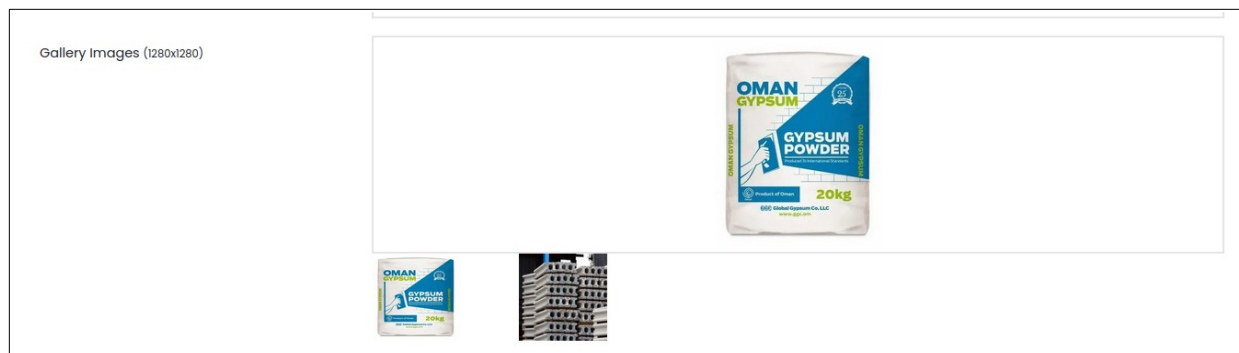

After saving a product, its name did not appear in the All Products table, but its variants names appeared.

Check the product “RAK Ceramic G13” for investigating the issue.

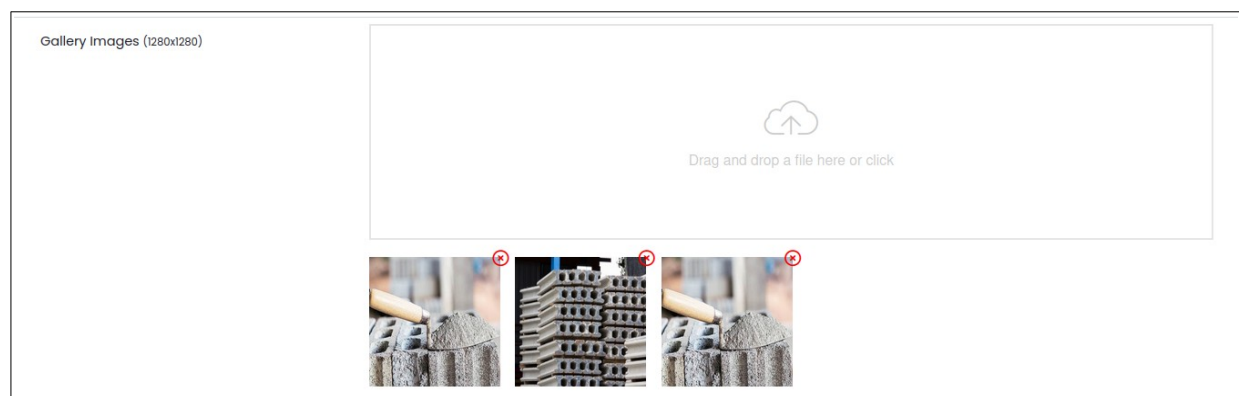

All products					
		Bulk Action ▾		Search product	
<input type="checkbox"/>	Name	Current Qty	Base Price	Status	Draft
<input type="checkbox"/>		0	--		No
<input type="checkbox"/>	P394A01	0	30 AED	Pending	No
<input type="checkbox"/>	P394A02	0	28 AED - 30 AED		Yes

## Gallery Images Removal

When creating a new product, user cannot remove an image. The user should be able to remove an image by clicking the red-cross just as in the product update. **(The same should apply for Thumbnail images)**

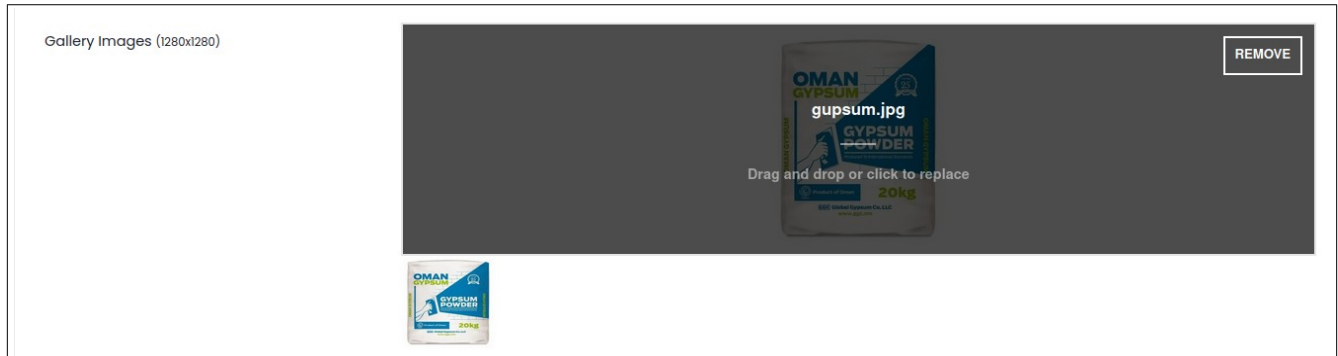

Product Creation

Product Update

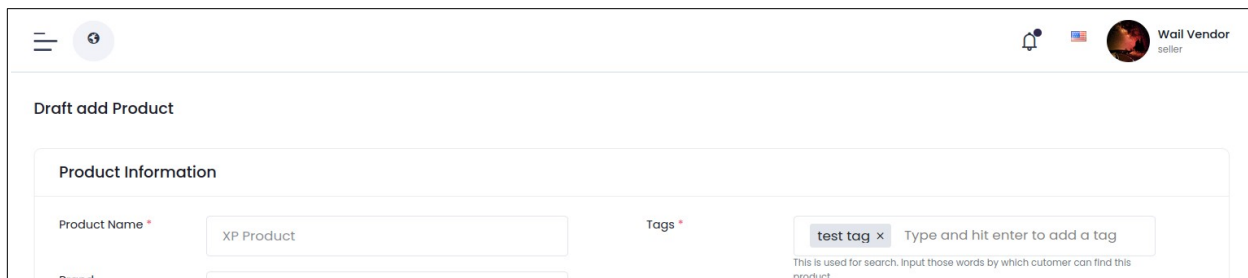

## Gallery Images Addition

If the user adds an image (or multiple images), then he cannot add additional images. The system enforces him to replace the added images. The expected behavior should allow the user to add images without replacement. **The same should be fixed for Thumbnail images.**

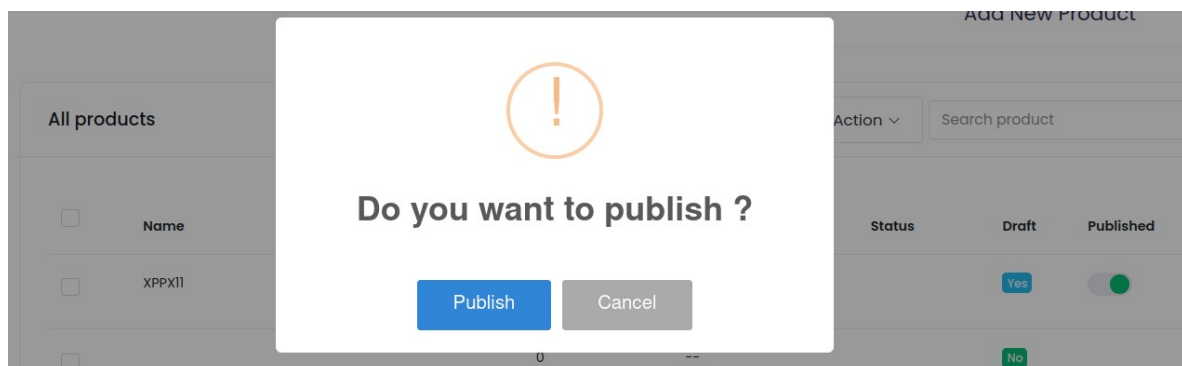

## Invisibility of Product Preview Button

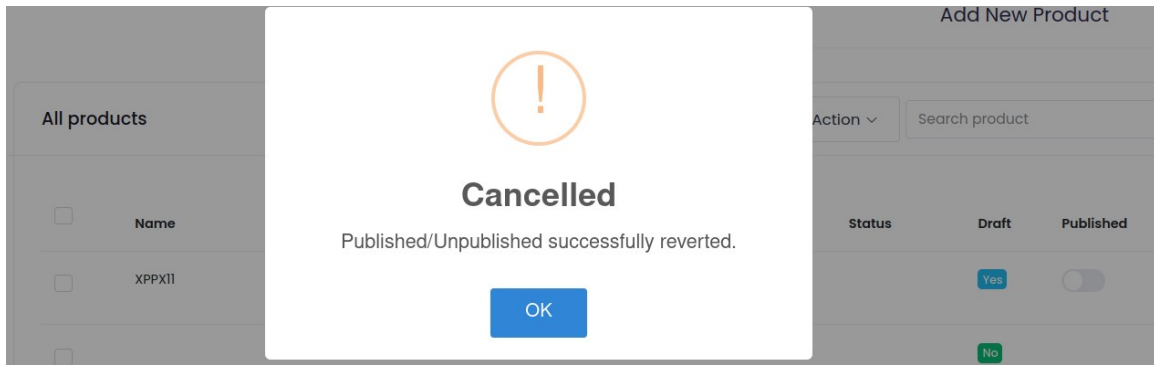

If a new product is saved as draft, then the user opens the product for editing, the “Product Preview” button disappears.

## Cancellation of Publish Popup

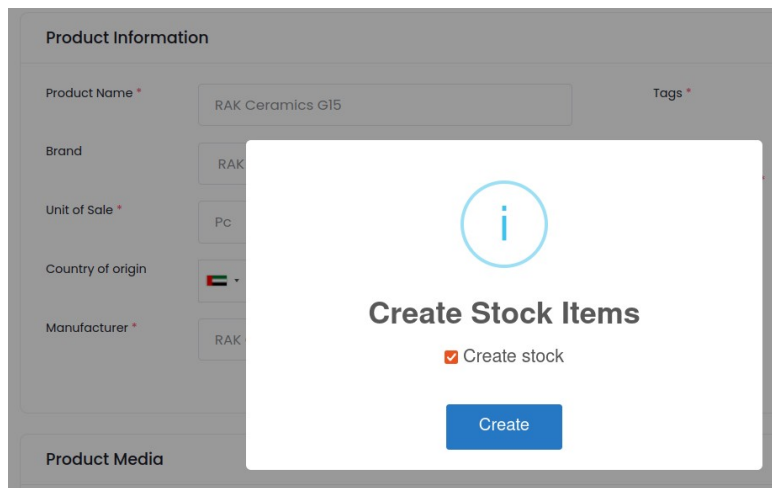

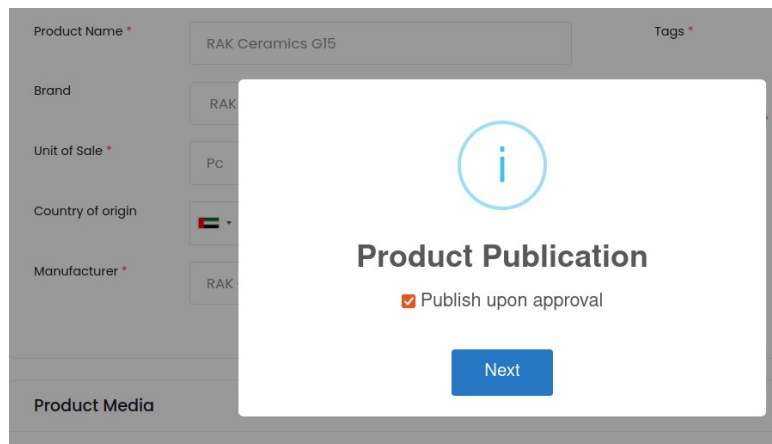

The second popup is not required if the user decides to cancel.

## Draft Saving

Draft saving should not prompt the user to publish or create stock.

## Mandatory Fields

All mandatory fields should have the red asterisk.

For example, the Brand is mandatory but does not have the red asterisk.

**Add the red asterisk for all mandatory fields.**

Product Name *	<input type="text" value="Vista-2005"/>
Brand	<input type="text" value="Select Brand"/>
Unit of Sale *	<input type="text" value="Unit (e.g. KG, Pc etc)"/>

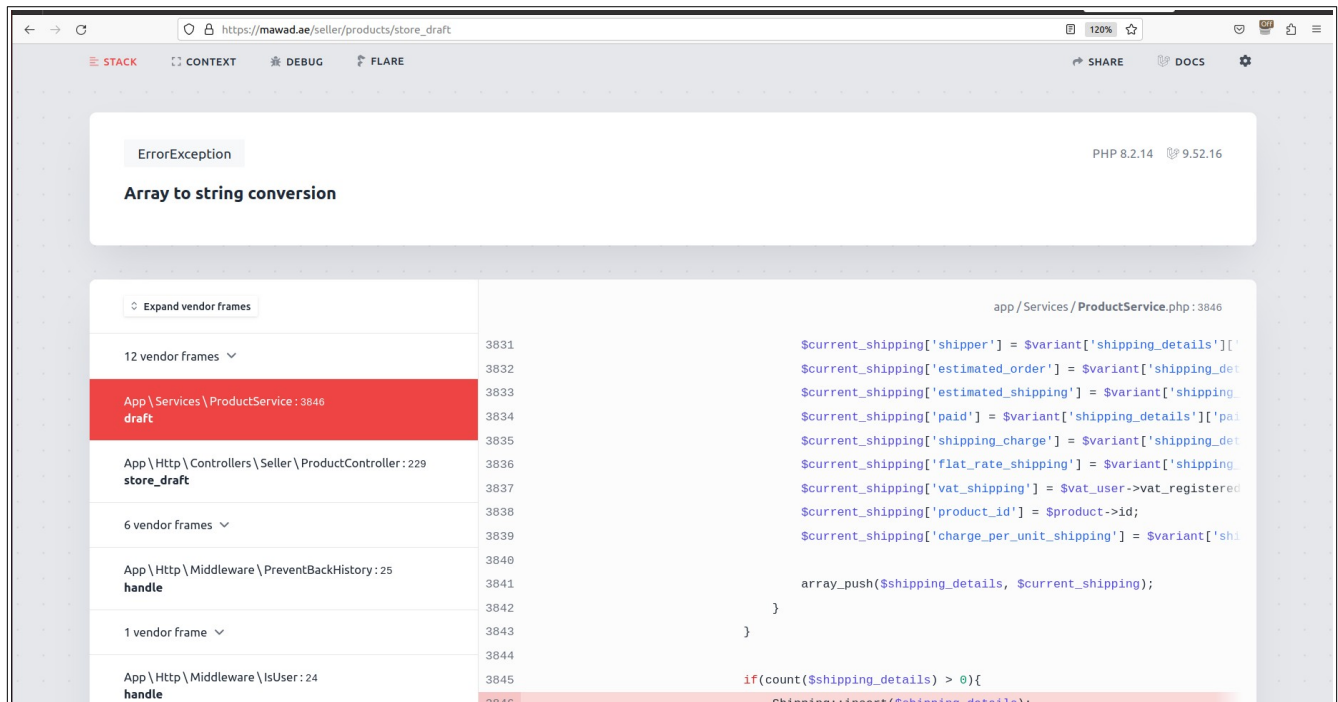

## Required Field Notification

If the user tries to save the product after filling the first five fields, the system does not notify the user that he has to fill the Tags. This happens after pressing the “Save as Draft” or “Upload Product”. The system does not make notification, nor inform the user of save action.

Product Information	
Product Name *	<input type="text" value="Vista-2005"/>
Brand	<input type="text" value="RAK Ceramics"/>
Unit of Sale *	<input type="text" value="Pc"/>
Country of origin	<input type="text" value="United Arab Emirates (الإمارات العربية المتحدة)"/>
Manufacturer *	<input type="text" value="XYZ Corp."/>
Tags *	<input type="text" value="Type and hit enter to add a tag"/> <small>This is used for search. Input those words by which customer can find this product.</small>
Short Description *	<input type="text"/>
	Remaining characters: 512
Show Stock Quantity	<input checked="" type="checkbox"/>
Refundable	<input checked="" type="checkbox"/>

## Saving Product after Draft Saving

If the user clicks “Create Product” after draft saving, an exception occurs.

### Shipping Charge Type (Naming & Applicability)

### Shipping Configuration

From QTY	To QTY	Shipper	Est. Order Prep. Days	Est. Shipping Days	Paid by	Shipping Charge
<input type="text" value="1"/>	<input type="text" value="10"/>	<div>vendor</div> <div>MawadOr</div>	<input type="text" value="1"/>	<input type="text" value="1"/>	<div>vendor</div> <div></div>	<div>Choose</div> <div></div>

## Images Order

Make the Gallery Images before the Thumbnail Images. The reason is that vendors can take gallery images using their phones, but it is cumbersome for them to make thumbnail images. In the requirements document, the system will generate thumbnail images from gallery images if the user did not submit them. Put a note under Thumbnail Image label indicating this “(Thumbnail images will be generated automatically from gallery images if not specified)”.

**Product Media**

Thumbnail Image (400x400)

Gallery Images (1280x1280)

## Responsiveness of Percentage Sign

The percentage sign needs to be responsive.

Preview

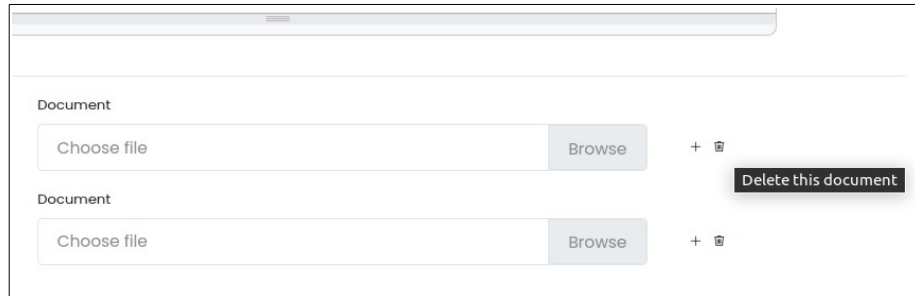

110% - + Reset

Amount	Discount Percentage
<input type="text"/>	<div><input type="text"/><div>%</div></div>

## Document Entry Removal

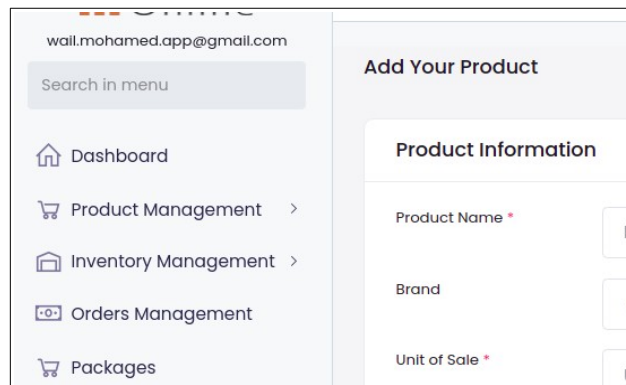

The first document entry should not be removable.

The screenshot shows a web interface for document management. It features two identical document entry forms stacked vertically. Each form has a 'Document' label, a 'Choose file' input field, and a 'Browse' button. To the right of each 'Browse' button is a '+' icon and a trash can icon. A tooltip with the text 'Delete this document' is visible next to the trash can icon of the first entry, indicating that the first entry is removable.

## Add Product – Sidebar Rendering

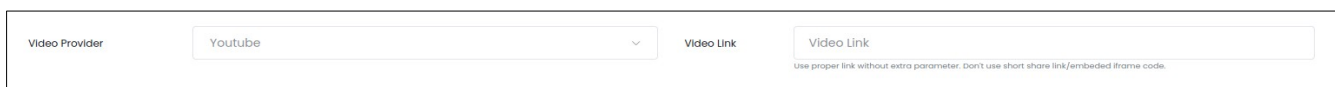

If the “Add Product” page is opened, the sidebar does not highlight the “Products” menu item.

The screenshot shows a web application interface. On the left is a sidebar menu with the following items: 'Dashboard', 'Product Management', 'Inventory Management', 'Orders Management', and 'Packages'. The 'Product Management' item is currently selected. The main content area is titled 'Add Your Product' and contains a form with the following fields: 'Product Name', 'Brand', and 'Unit of Sale'. The 'Product Name' field is highlighted with a red border.

## Video Inputs

- Reduce the width of Video Provider around 60%, and increase the width of Video Link.
- Reduce the width of the labels to make the input close its label (especially the label of Video Provider)
- Increase the space between Video Provider input and Video Link label.

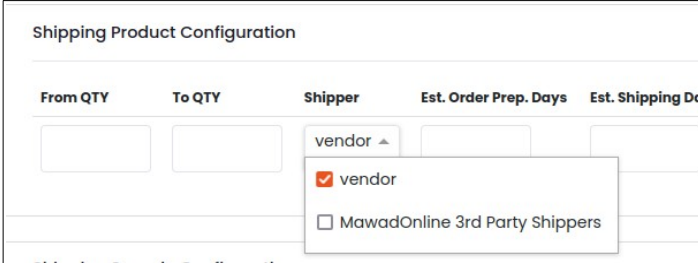

The screenshot shows a form with two input fields. The first field is labeled 'Video Provider' and has a dropdown menu with 'Youtube' selected. The second field is labeled 'Video Link' and has a text input field. Below the 'Video Link' field, there is a small note: 'Use proper link without extra parameter. Don't use short share link/embedded iframe code.'

## Selection of 3<sup>rd</sup> Party Shipper

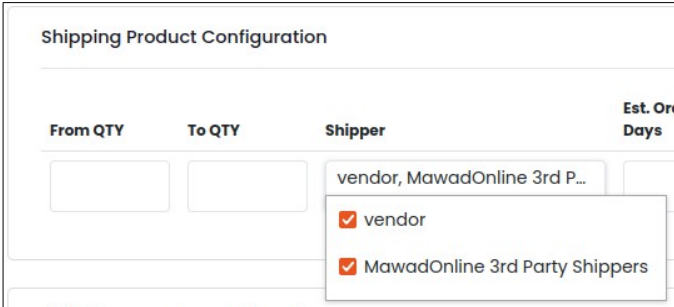

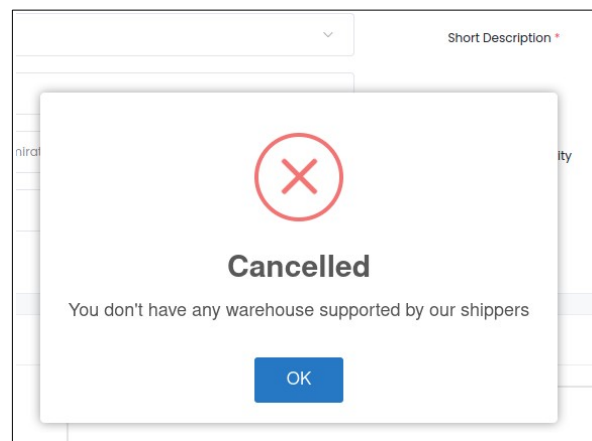

As in the following snapshots, when you select 3<sup>rd</sup> party shipper, the system scrolls the page up to show a popup, and then the option is selected.

Required fixes:

- No page scrolling.
- The popup should show the following message: “You don’t have any warehouse supported by MawadOnline 3<sup>rd</sup> party shippers. If you haven’t created your warehouses, you can save the product as draft, create your warehouses by going to the Warehouses page under Inventory Management, and then you may continue editing your product”.
- The option shall not be selected since all 3<sup>rd</sup> party shippers cannot service.

The image shows a 'Shipping Product Configuration' form. It has columns for 'From QTY', 'To QTY', 'Shipper', 'Est. Order Prep. Days', and 'Est. Shipping Da'. The 'Shipper' dropdown menu is open, showing two options: 'vendor' (selected with a red checkmark) and 'MawadOnline 3rd Party Shippers' (unselected with a grey checkbox).

The image shows the 'Shipping Product Configuration' form again. The 'Shipper' dropdown menu is open, and both 'vendor' and 'MawadOnline 3rd Party Shippers' are now selected, each with a red checkmark.

## Enabling Shipping Charge Type

Shipping Charge Type should not be enabled if shipping is paid by vendor.

The screenshot shows a 'Shipping Product Configuration' form. It has sections for 'Shipping Product Configuration' and 'Shipping Sample Configuration'. The 'Shipping Product Configuration' section includes 'From QTY', 'To QTY', and 'Shipper' fields. The 'Shipping Sample Configuration' section includes 'Shipping-by' and 'Paid by' fields. A modal dialog is overlaid on the form with the title 'Cancelled' and the message 'You cannot choose shipping charge when it is paid by vendor.' The modal has an 'OK' button.

## Spacing between Variants

Make a fair spacing between variants.

The screenshot shows a variant configuration form. It has a 'Published' checkbox, a 'Low-Stock Warning' checkbox, and a 'Variant Information 2' section. The 'Variant Information 2' section has a 'Variant SKU' input field. The form is designed to show fair spacing between the variants.

## Alignment of Labels and Inputs

Make the labels aligned and of the same width.  
Accordingly, the inputs must be aligned.

The screenshot shows a sample configuration form. It has a 'Sample Available?' checkbox, a 'Use default sample pricing configuration' checkbox, a 'Sample description' input field, a 'Sample price' input field, a 'Use default sample Shipping' checkbox, a 'Published' checkbox, and a 'Low-Stock Warning' checkbox. The form is designed to show alignment of labels and inputs.

## Labels Background

Labels in Product Information & Product Media should have the same gray background as other labels on the page.
